Object: quality of canned vegetables in Europe

The groupe d'aucy produces cans of vegetables on several industrial sites located in France, Hungary and Spain.

Cans of vegetables are manufactured according to the same standards of quality on all of our industrial sites, regardless of the production site, and are marketed in all of the European countries according to these standards, in particular under the Globus and d'aucy national brands.

Our quality policy is to offer all consumers a consistent quality no matter where the product is purchased.

Agnès GIRARD

D2L Quality Director - Groupe d'aucy
